PROFILE

I am a Full Stack Developer in continuous growth with knowledge in C++, JavaScript, React.js, Node.js, SQL, among others.
I am passionate about creating scalable, high-performance web applications or systems. I am characterized by my proactivity, empathy, and self-taught ability.
I am constantly looking for challenging opportunities in dynamic teams where I can continue learning, growing, and adding value.
My focus is on developing innovative and efficient solutions, always committed to code quality and user experience.

TECH SKILLS

JAVASCRIPT AND C++

Frontend: Html, Css, ReactJs, Redux
Backend: NodeJs, Sequelize, Express
Data Base: MongoDB y SQL

PROJECTS

C++ - Hundred or Straight game

Academic Experience - Programacion 1 - UTN   jun 2024-

The group project of the subject Programming 1 of the University Technician in Programming at the UTN involves the creation of a console game using C++.

This game must include a menu with the following options: one player, two players, a simulation that allows the user to enter the dice manually, and a ranking with the positions of those who have obtained the highest scores.

Technologies: C++
https://github.com/julcontrerass/CienOEscaleraUTN
