PROFILE

I am a Full Stack Developer with a focus on the continuous improvement of my skills and knowledge. I have training in web development that has allowed me to develop skills to work effectively as a team and overcome challenges with determination.

My quest for knowledge does not stop there. Currently, I am expanding my skills through advanced courses, such as Microservices Architecture and NoSQL Databases, as well as carrying out personal projects that challenge me and allow me to apply what I have learned in practical situations. I am committed to constant growth and ready to face new challenges in web development.
